PROFILE

* I am a postdoctoral research assistant in Astrophysics at the University of Oxford. My research is focused on advanced millimetre- and submillimetre-wave receivers for radio astronomy. For my DPhil thesis, I developed a wide bandwidth SIS mixer and a focal plane array at 230 GHz.
* I have a strong technical background in:
  - **Superconducting detectors**: SIS mixer theory, modelling quantum tunnelling effects, and testing SIS devices in cryogenic systems
  - **Electrical engineering**: RF design, electromagnetic simulations, and low-noise testing
  - **Software development**: building complex simulation software and analyzing experimental results from SIS mixers
* I have published my research in top academic journals, including 4 first author papers. These papers combined have 179 citations.

Work Experience

POSTDOC

Astrophysics, University of Oxford, Oxford, UK — Sep. 2018 – pres.

* Projects: Testing a new terahertz receiver system, simulating frequency multiplication in distributed SIS junctions, and developing a focal plane array at 230 GHz.
* Publishing the research from my DPhil.

Education

DOCTORATE

DPhil Astrophysics, University of Oxford, Oxford, UK — 2014 – 2018

* Supervisor: Prof. Ghassan Yassin
* Thesis: *A 230 GHz Focal Plane Array Using a Wide IF Bandwidth SIS Receiver*
  - Developed a wide bandwidth SIS mixer and a 1×4 focal plane array
  - Built a software package to simulate SIS mixer operation/performance (online: QMix)
  - Observed star formation in intermediate redshift galaxies using the IRAM 30 m telescope

MASTERS

MSc Electrical Engineering, University of Calgary, Calgary, Canada — 2012 – 2014

* Supervisor: Dr. Elise Fear
* Thesis: *Average Dielectric Property Analysis of Non-Uniform Structures*
  - Developed a new technique to estimate the average dielectric properties of complex and non-uniform structures using microwave transmission measurements
  - This can be used to provide *a priori* information to microwave imaging algorithms
* Graduate courses including letter grade: Antenna Design (A+), RFIC Design (A+), Analog IC Design (A), RF Microwave Passive Circuits (A+). GPA: 4.0 / 4.0

BACHELORS

BSc Electrical Engineering, University of Alberta, Edmonton, Canada — 2008 – 2012

* Capstone project: *Nanowire Metamaterials for Biosensing Applications*
* Graduated with distinction

Scholarships and Awards

Scholarships

* Clarendon Fund Scholarship & New College Graduate Scholarship — 2014 – 2018
  - £13,863/year plus all university and college fees for 3.5 years
  - Awarded to top 1.8% of graduate applicants to Oxford
* Alberta Innovates Technology Futures (AITF) Scholarship — 2012 – 2014
  - Provincial award, $26,500/year for 2 years
* NSERC Undergraduate Student Research Award (USRA) — 2011
  - National award, $4,500/16 weeks

Selected Awards

* ALIS Sir James Lougheed Award of Distinction (Doctoral) — 2015
  - Provincial scholarship (1 of 8 yearly): $20,000
* IEEE Antennas and Propagation Pre-Doctoral Research Award — 2013
  - International award (1 of 6 yearly): $1,000 USD

Teaching

Teaching Assistant

* First Year Electromagnetics, University of Oxford — 2016 – 2018
  - Assisting weekly labs (24 hrs./term)
* Electromagnetic Waves and Applications, University of Calgary — 2013 – 2014
  - Planning material, grading, and delivering tutorials and labs (102 hrs./term)
* Electromagnetic Fields and Applications, University of Calgary — 2013
  - Assisting weekly tutorials, drop-in hours and grading (68 hrs./term)

Extracurricular

Volunteer

* Stargazing at Oxford (science outreach) — 2014 – 2018
* Sports Representative, New College MCR Committee — 2015
* Volunteer Ski Instructor, Canadian Association for Disabled Skiing — 2012 – 2013

Competitive Athletics

* New College Rugby Football Club — 2014 – 2018
* New College VIII's (rowing) — 2014 – 2015
* Calgary Rams Rugby Club — 2012 – 2014
* University of Calgary Triathlon Club — 2013
* University of Alberta Triathlon Club — 2010 – 2012
